Sudipta Deb

Salesforce Technical Architect
Waterloo, Canada
M: +1-519-502-0688
E: sudipta.deb@gmail.com

Summary

Enterprise Technical Architect offering 19 years of expertise in leading end-to-end delivery of innovative cloud platforms, with deep specialization in **Salesforce** and **Google Cloud**. Recognized for excellence in **architectural analysis, governance, and best practice implementation** for international organizations. Possesses **23 Salesforce, 2 Google Cloud certifications** and an **Applied Data Science Program credential from MIT**, enabling the strategic adoption of **Artificial Intelligence** to enhance system scalability, maximize ROI, and generate significant, meaningful business insights from vast datasets.

Skills

Salesforce

- **AgentForce, Sales Cloud, Service Cloud, Public Sector, Health Cloud, Experience Cloud, Health Cloud, Higher Education Cloud.**
- **Apex, Lightning Web Component, Integration, Mulesoft, OmniStudio, JavaScript, Flow.**
- **Trailhead Profile:** https://trailblazer.me/id/sudeb84

Google Cloud

- Kubernetes, Cloud Run, Gemini, Vertex AI
- **Google Cloud Certification Profile:** http://bit.ly/3mL55jZ
- **Google Developer Profile:** https://developers.google.com/profile/u/sudiptadeb

Data Science

- Data Analysis, Python, NumPy, Pandas, TensorFlow, LookerML
- LLM, Generative AI, Deep Learning, Machine Learning.

Github: https://github.com/suddeb

Certification

- Applied Data Science from MIT https://bit.ly/446QRgU
- 23x Salesforce Certifications - https://trailblazer.me/id/sudeb84
- 2x Google Cloud Certifications - http://bit.ly/3mL55jZ
- Java SE 7 Certified Developer
- Algorithm: Design and Analysis Certified from Stanford University.

Experience (Last 10 Years)

🏗️ Technical Architect, Independent (May 2023 - Present)

Location: Waterloo, Ontario.

Key Architectural Achievements & Responsibilities:

- **Public Sector Digital Transformation:** Led the implementation of a full-scale Salesforce Sales and Experience Cloud solution for the **Ministry of Transport, Government of Ontario**, enabling both a customer-facing portal and internal process automation for public sector services. Link:

https://www.ontario.ca/page/ministry-transportation

- **Insurance Portal Architecture:** Currently architecting and enabling **Agentforce for Sales, Service Cloud and Experience Cloud** for the Ontario Teacher's Insurance Plan (OTIP), providing an all-in-one, secure portal for active plan members to access and manage group benefits and OTIP insurance policies. Link: https://tinyurl.com/ybsm7bey
- **AI/Automation Integration:** Led the design and implementation of Salesforce-based automation, workflows, and integrations, specifically embedding **AI agents** directly into critical business processes. Implementing AgentForce with DataCloud and Profisee for hyperscale data engine designed to ingest, harmonize, and activate data across the Salesforce ecosystem.
- **Golden Record:** Primary purpose is to solve the "fragmented customer view" problem by unifying data from disparate sources (Salesforce apps, mobile, web, legacy systems, data lakes) into a single, actionable "Golden Record."
- **Data Governance & Optimization:** Architected robust Salesforce data models, ensuring data integrity, optimized storage/retrieval, and enforcing rigorous validation rules and normalization practices across the environment.
- **Complex Integration & Security:** Executed complex, diverse integration patterns to connect Salesforce with external systems and deployed comprehensive Salesforce security models (including role-based access controls and field-level security).
- Managed key platform activities, including Salesforce case management, data loading, data cleansing, and optimization of configurations to enhance user experience and maximize system performance.

⚙️ Program Architect, Salesforce Experience Cloud Implementation (Dec 2023 - Mar 2025)

Location: Waterloo, Ontario.

Key Architectural Achievements & Responsibilities:

- **End-to-End Solution Leadership:** Led the end-to-end technical solution design and architecture for the **Salesforce Agentforce platform**, ensuring alignment with the insurance company's business requirements and IT strategy.
- **Scalable Solution Design:** Designed scalable, high-performing, and secure Salesforce solutions by leveraging **Sales Cloud, Experience Cloud, and custom development**.
- **Comprehensive Documentation:** Developed comprehensive technical design documents, detailed data models, robust integration strategies, and thorough deployment plans.
- **360-Degree View Architecture:** Designed the architecture to enable agents to instantly access a **360-Degree Customer View** of policyholder profiles, including all policies, claims history, communication logs, payment status, and preferences.
- **Core Customization & Configuration:** Guided the customization and configuration of Salesforce standard objects (Accounts, Contacts, Cases, Opportunities) and created custom objects (e.g., Policy, Claim, Product) to support complex insurance scenarios.
- **Automated Workflows:** Architected and oversaw the development of declarative automations (Flows, Process Builder) and custom code (Apex classes, Visualforce pages, Lightning Components - Aura/LWC) to automate routine tasks like policy onboarding, renewals, and commission calculations.
- **Data Migration & Consistency:** Developed and executed strategies for migrating large volumes of legacy customer, policy, and claims data into Salesforce, ensuring data integrity and quality. Architected data synchronization processes to maintain consistency and accuracy across integrated systems.
- **Robust Security Model:** Implemented robust security models, including profiles,

permission sets, sharing rules, and data encryption, to ensure compliance with regulatory requirements.

🚀 Program Architect, Salesforce (July 2021 - May 2023)

Location: Waterloo, Ontario.

Key Architectural Achievements & Responsibilities:

- **Market Growth & Revenue Generation:** Secured multiple **Health Cloud opportunities** in the AMER East Coast region in FY 2022, totaling approximately **$5.2 million**.
- **Strategic Leadership & Vision:** Provided strategic leadership, vision, and direction for enterprise-wide information and information technology (I&IT) strategy planning, development, execution, and evaluation, ensuring alignment with corporate strategy and business solutions.
- **Team Leadership & Management:** Led a team of **10 developers** (onshore/offshore) across multiple development streams, including Salesforce Experience Cloud, Service Cloud implementations, and provider network redesign. Link: https://www.vsp.com/
- **I&IT Accountability:** Held accountability for customer Information Technology performance and key activities, while embodying and promoting customer leadership values.
- **Security & Identity Architecture:** Designed and implemented cloud security, identity and access management (IAM), single sign-on (SSO), OAuth, and two-factor authentication solutions.
- **Practice & Market Focus:** Led a team of **5 solution engineers** in Canada's **Health Cloud** practice, focusing on the AMER East Coast Health Cloud market.
- **SDLC Management:** Managed release and environment processes, including sandbox usage planning, metadata and data migration, environment comparisons, and version control.
- **Technical Advisory:** Provided technical advisory services, including delivering technical pitches and estimations for new Request for Proposals (RFPs).
- Directed and oversaw the development of business requirements, specifications, process flows, application design, configuration, and testing for cloud-based business technology solutions.

🏦 Salesforce Technical Architect, CIBC Global Market (Aug 2020 - Jul 2021)

Location: Waterloo, Ontario.

Key Architectural Achievements & Responsibilities:

- **Technical Architecture Leadership:** Acted as the Technical Architect for CIBC's Global Market Salesforce Implementations, providing technical designs and solutions for all Salesforce.com projects.
- **Full-Stack Salesforce Development:** Provided hands-on design and development of custom solutions on the force.com platform, including significant work in Apex, VisualForce, Lightning Web Components (LWC), and application integration patterns.
- **Platform Expertise:** Served as the technical expert on projects focused on core Salesforce Clouds, including Sales Cloud, Service Cloud, Community Cloud, Education Cloud, and Lightning.

- **Solution Delivery:** Responsible for delivering comprehensive technical designs and solutions that met the complex requirements of the Global Market division.

🏛️ Salesforce Technical Architect, Appirio/Florida State University (Aug 2018 - Aug 2020)

Location: Waterloo, Ontario.

Key Architectural Achievements & Responsibilities:

- **Practice Leadership & Growth:** Responsible for growing the **Appirio Salesforce practice in Canada Geo** and leading the entire technical team for Appirio Canada.
- **Platform Consolidation (Org Merge):** Performed a critical **Org Merge** operation to consolidate records between different departments of Florida State University (FSU), solving the complex challenge where each department previously maintained their own distinct Salesforce instances.
- **Student Onboarding Implementation:** Implemented a new Student Onboarding Program for FSU utilizing **Salesforce Experience Cloud**.
- **Technical Design Authority:** Provided technical designs and solutions for all Salesforce.com projects.
- **Code Quality & Development:** Performed **code reviews** and was responsible for development activities spanning **Apex, Visualforce, JavaScript, and Lightning Components**.

💳 Salesforce Technical Architect, Cognizant Technology Solutions

Project: Service Cloud Implementation - Contact Center Transformation (Dec 2015 – Aug 2018)
Location: Kitchener, Ontario.

CRM Solution Design: Developed a comprehensive **CRM solution plan and design** for the implementation of **Service Cloud** to facilitate Case Management, Call Interaction Center (service) processes, Master Data Management Integration, and CRM process integration with external systems.
Enterprise-Wide Deployment: The solution was successfully utilized by the service teams of Manulife Financial across various Business Units, including **Retail, Bank, Securities, and Mortgage**.

Project: Customer Portal Implementation (March 2016 – Dec 2016)
Location: Kitchener, Ontario.

- **Operational Efficiency Achievement:** Engineered a transformative design for Digital Solution (DS) business processes within the Customer Portal environment, which yielded an **average reduction of 30% in process costs** upon implementation, significantly enhancing operational efficiency within critical facets of the Customer Portal.
- **Integration Strategy:** Strategized and defined business process implementation requirements through collaboration with key stakeholders from Manulife Digital Solution Sales and Service departments.
- **Security & SSO Implementation:** Implemented integration with IBM Security Access Manager and established seamless integration with Vitality through **single sign-on (SSO)** functionality.

🌍 Salesforce Technical Lead, Cognizant Technology Solutions (Jan 2015 - Dec 2015)

Project: Service Console Implementation
Client: Gard, Norway
Location: Kolkata, India & Oslo, Norway

Key Leadership & Deployment Achievements:

- **Global Team Leadership:** Directed a global team of **15 developers and administrators** across testing and deployment activities.
- **Complex Rollouts:** Successfully deployed **multiple simultaneous regional rollouts** while navigating complex challenges and ensuring all project timelines were met.
- **Project Management & Planning:** Managed team resource allocation and assignment planning, and oversaw both **Unit and User Acceptance Testing (UAT)** phases.
- **Goal Alignment & Performance:** Established project objectives and conducted performance evaluations, achieving **near-perfect completion** of team members' developmental objectives through alignment of individual and organizational goals.
- **Project Focus:** The project centered on the implementation of a **Service Console**.

Education

Bachelor of Technology

Computer Science and Engineering — 2003-2007
